What we offer

CompTIA Certification

Microsoft Certification

Cisco Certification

EC-Council Certification

Oracle Certification

ISO Certification

ISACA Certification

ISC2 Certification

AXELOS Certification

Symantec Certification

Project Management Certification

Other Certification

CompTIA Certification

[CompTIA A+](#) is the foundation of your IT career. CompTIA A+ is the preferred qualifying credential for technical support and IT operational roles. It is about much more than PC repair.

The [CompTIA Network+](#) Certification Study Guide is built around the learner's needs, to take you on a path of steady learning progress. Get started immediately with a clear learning process and schedule and familiarize yourself with all certification topics.

[CompTIA Cloud+](#) validates the skills you need to maintain and optimize cloud infrastructure services. Cloud+ covers the increased diversity of knowledge, skills and abilities required of system administrators to validate what is necessary to perform effectively in data center jobs.

Microsoft Certification

MCSA: Windows Server 2016 certification qualifies you for a position as a network or computer systems administrator or as a computer network specialist, and it is the first step on your path to becoming a Microsoft Certified Solutions Expert (MCSE).

MCSA: Office 365 certification qualifies you for a position as a software as a service (SaaS) administrator or cloud applications administrator focused on managing Office 365 business productivity products like Exchange, SharePoint, and Skype for Business.

MCSA: SQL 2016 Database Administration certification qualifies you for a position as a database administrator or infrastructure specialist.

MCSE: Securing Windows Server 2016 covers methods and technologies for hardening server environments and securing virtual machine infrastructures using Shielded and encryption-supported virtual machines and Guarded Fabric.

Cisco Certification

CCNA Routing and Switching certification will not only prepare you with the knowledge of foundational technologies, but ensure you stay relevant with skill sets needed for the adoption of next generation technologies.

Cisco Certified Network Associate Security (CCNA Security) validates associate-level knowledge and skills required to secure Cisco networks. With a CCNA Security certification, a network professional demonstrates the skills required to develop a security infrastructure, recognize threats and vulnerabilities to networks, and mitigate security threats.

Cisco Certified Network Associate Service Provider (CCNA SP) certification is for service provider network engineers, technicians and designers who focus on the latest in Service Provider industry core networking technologies and trends.

Cisco Certified Network Professional (CCNP) Routing and Switching certification validates the ability to plan, implement, verify and troubleshoot local and wide-area enterprise networks and work collaboratively with specialists on advanced security, voice, wireless and video solutions.

EC-Council Certification

The **Certified Network Defender (CND)** certification program focuses on creating Network Administrators who are trained on protecting, detecting and responding to the threats on the network. Network administrators are usually familiar with network components, traffic, performance and utilization, network topology, location of each system, security policy, etc.

A **Certified Ethical Hacker (CEH)** is a skilled professional who understands and knows how to look for weaknesses and vulnerabilities in target systems and uses the same knowledge and tools as a malicious hacker, but in a lawful and legitimate manner to assess the security posture of a target system(s).

Computer Hacking Forensic Investigation (CHFI) is the process of detecting hacking attacks and properly extracting evidence to report the crime and conduct audits to prevent future attacks. Computer Security and Computer investigations are changing terms. More tools are invented daily for conducting Computer Investigations, be it computer crime, digital forensics, computer investigations, or even standard computer data recovery.

Oracle Certification

The [Oracle Database 12c R2: Administration Workshop Ed 3](#) course is designed to provide you with a firm foundation in administration of an Oracle Database. In this course you will gain a conceptual understanding of Oracle Database architecture and learn how to manage an Oracle Database in an effective and efficient manner.

This Database [Program with PL/SQL](#) training shows you how to develop stored procedures, functions, packages and database triggers.

This [Oracle BI 12c](#) training teaches you how to use Oracle Business Intelligence Enterprise Edition tools. It's designed for end users & implementation team members who analyze, build, modify & administer dashboards.

This [Introduction to SQL](#) training teaches you basic concepts of relational databases and the SQL programming language. You'll gain essential SQL skills to write queries against single & multiple tables, manipulate data in tables & create database objects.

ISO Certification

ISO/IEC 27001 Lead Auditor training enables you to develop the necessary expertise to perform an Information Security Management System (ISMS) audit by applying widely recognized audit principles, procedures and techniques.

ISO/IEC 27001 Lead Implementer training enables you to develop the necessary expertise to support an organization in establishing, implementing, managing and maintaining an Information Security Management System (ISMS) based on ISO/IEC27001.

ISO 22301 Business Continuity Management System training is designed to protect, reduce the likelihood of occurrence, prepare for, respond to, and recover from disruptive incidents when they arise. With a Business Continuity Management System, your organization is prepared to detect and prevent threats.

Certified Data Protection Officer (DPO) training course enables you to develop the necessary knowledge, skills and competence to effectively implement and manage a compliance framework with regard to the protection of personal data.

ISACA Certification

The skills and practices that **Certified Information Systems Auditor (CISA)** promotes and evaluates are the building blocks of success in the field. Possessing the CISA demonstrates proficiency and is the basis for measurement in the profession.

Certified Information Security Manager (CISM) means higher earning potential and career advancement. Recent independent studies consistently rank CISM as one of the highest paying and sought after IT certifications.

Certified in the Governance of Enterprise IT (CGEIT) recognizes a wide range of professionals for their knowledge and application of enterprise IT governance principles and practices. As a CGEIT certified professional, you demonstrate that you are capable of bringing IT governance into an organization—that you grasp the complex subject holistically, and therefore, enhance value to the enterprise.

Certified in Risk and Information Systems Control (CRISC) is the only certification that prepares and enables IT professionals for the unique challenges of IT and enterprise risk management, and positions them to become strategic partners to the enterprise.

ISC2 Certification

Certified Information Systems Security Professional (CISSP) accelerates your cybersecurity career. Earning the CISSP proves you have what it takes to effectively design, implement and manage a best-in-class cybersecurity program.

AXELOS Certification

The **ITIL v4 (Information Technology Infrastructure Library)** certification scheme provides a modular approach to the ITIL framework, and is comprised of a series of qualifications focused on different aspects of ITIL best practice to various degrees of depth and detail.

Symantec Certification

The **Symantec Data Loss Prevention 15.0 Administration** course is designed to provide you with the fundamental knowledge to configure and administer the Symantec Data Loss Prevention Enforce platform.

Project Management Certification

The **Project Management Professional (PMP)** certification is the gold standard of Project Management Certification. Recognized and demanded by organizations worldwide, the PMP validates your competence to perform in the role of a project manager, leading and directing projects and teams.

Six Sigma at many organizations simply means a measure of quality that strives for near perfection. It can be called “Six Sigma,” or it may have a generic or customized name for the organization like “Operational Excellence,” “Zero Defects,” or “Customer Perfection.”

CompTIA Project+ gives business professionals – inside and outside of IT – the basic concepts to successfully manage small- to medium-sized projects.

Other Certification

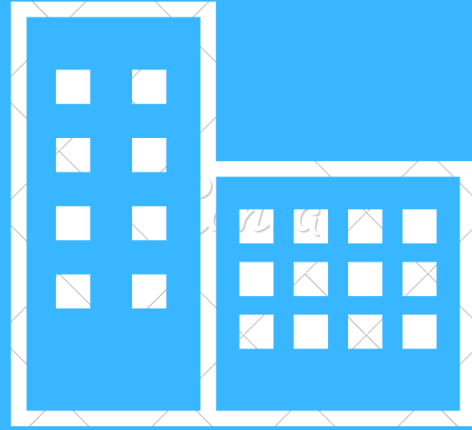

The [GDPR Foundation](#) training enables you to learn the basic elements to implement and manage a compliance framework with regard to the protection of personal data.

The [Symantec Cyber Security Services Administration](#) course will provide a technical deep dive and hands on experience with Symantec's Cyber Security Services.

[Symantec Disaster Recovery Manager \(DR\)](#) training includes policies and procedures aimed at protecting an organization from human or naturally triggered disruptions on the IT infrastructure. It plays a significant role in the prevention of data losses, financial consequences, loss of trustworthiness and organizational reputation.
